

Scheda 3

A) Which is the biggest?

1. Write from the smallest to the biggest:

pint, gallon, cup, quart, fluid ounce

.....

2. Complete with the correct symbol (>,<>=):

3cups.....1gallon	2quarts.....64fluid ounces	6pints.....4 quarts
4pints.....7cups	12 fluid ounces.....2cups	2gallons.....12pints

B) Choose the appropriate unit of measurement if you want to measure

petrol for your motorbike (5-10l)

water to fill a bath

water to prepare tea for two

water to have a shower

a dose of cough syrup

water to fill a sauce pan

a small bottle of milk

a can of coca-cola

an alcoholic drink

C) A bath full of water contains 25gallons of water.

How many pints do you need to empty it?

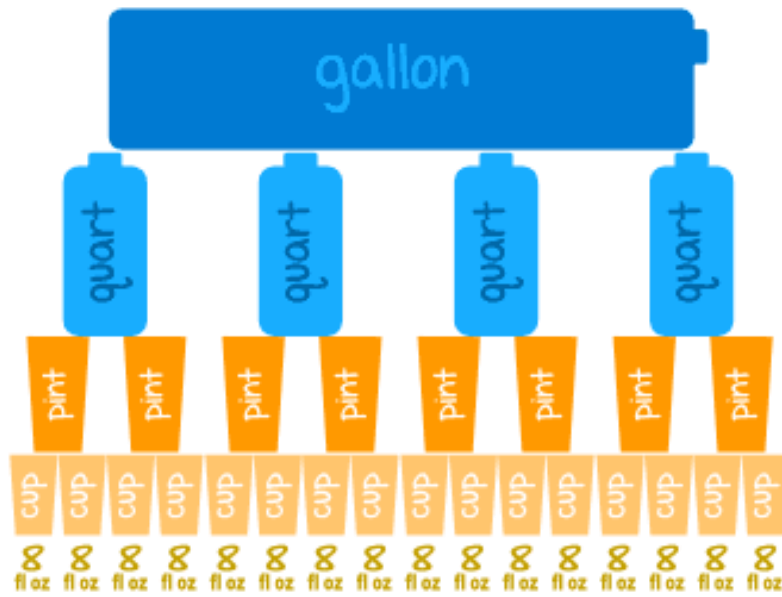

How many quarts do you need to empty it?

How many fluid ounces do you need to empty it?

How many cups do you need to empty it?

So, let's summarize:

if you use a smaller/bigger container, you have to fill it fewer/more times.
